IST Hangout Treehouse

Have you checked out the treehouse in the IST hangout area? We headed up to the platform - which is above sea level! - to feel the wind blow through our hair and cool us down. Halfway up a linden tree (a national symbol of Slovenia) a team of Slovenian IST have built a hangout for all to enjoy - Luka, Jakob and Gasper started small, but were delivered some extra supplies and the project grew and grew. After some miscommunication the structure became even bigger, and now boasts a food-lift, a fridge (with fresh fruit and juices) and plenty of space to relax.

IST Hangout Treehouse

As-tu vu la cabane dans l'arbre au IST Hangout ? Nous sommes allés explorer et nous sommes montés sur la plateforme qui est située au dessus du niveau de la mer, cheveux au vent et une bonne brise rafraîchissante ! À mi-hauteur du tilleul, l'arbre national de la Slovénie, une équipe de EIS slovènes a bâti ce refuge que tous peuvent apprécier. Pour Luka, Jakob et Gasper, le projet a commencé sur une petite échelle mais comme plus de matériaux ont été livrés, le projet a pris de l'ampleur. Quelques communications mal interprétées ont permis à la structure d'être bonifiée encore plus et on y trouve maintenant un.

Chilled but Challenged

Also in Tulipa the "Chilled but Challenged" area has been built, where some rather warm looking IST appear un-challenged by the job at hand. Oscar and Ricardo, Mike and Jakob are building seats out of wooden pallets. This is Oscar's first International Scout Camp, and they had no idea what to expect when they got here, but are really enjoying themselves. Ricardo is happy at work here - carpentry is a favourite hobby back home, and they have their own garage workshop! Mike will be working in the Rainbow Cafe for most of the camp, but until that opens they are lending a hand wherever they can. Jakob was one of the fantastic group of IST who spent several hours cleaning The Hague campsite in the baking heat - despite being worn out, and only having made it to Zeewolde very late, they were back to work again the next day and happy to be doing all sorts of different jobs for the camp - who knows what tomorrow will bring?

The IST camp hums with activity, but sings with the Roverway Spirit!

Unsung heroes: Telecom

Imagine there is no access to WIFI during Roverway 2018. That would be rather dull. But thanks to our unsung heroes in Telecom we do have many wifis here. For example IST and participant have their own. That is only a little piece of what they are doing but at the same time it is the one that is most visible to everyone. Perhaps you have noticed the little booth that says Telecom on the main road of the camp? There you can find the people that work hard to give us access to wifi. Besides the wifi Telecom handles all the IT infrastructure on the campsite. They also handle the radio and phone systems. There are up to 14 people working in Telecom team and one of them is always in the central communication hub for emergency situations. Their job is crucial for a camp to work properly even though you can't see it. So let's give a big thanks to Telecom team!
